

## Vision

With the 2050 Plan, the Walla Walla Valley seeks to create “Mobility for All Users,” through its simple, yet encompassing vision:

“Enhance the safety, connectivity, and condition of our transportation system to provide sustainable, resilient, safe, convenient, and efficient mobility for all users—residents, workers, and visitors—while enriching the quality of life and reflecting community character.”

## Goals - Themes/Categories

- Safety, Security, and Health

“Keep people safe while using transportation by reducing accidents, protecting from intentional harm, and improving public health by encouraging walking, cycling, and reducing pollution.”

1. **Safety** – Protect transportation users from unintentional harm.
2. **Security** – Protect transportation users from intentional harm.
3. **Health** – Promote public health through active transportation options (walking, cycling) and reduce pollution.

- Infrastructure Preservation and Resilience

“Maintain and improve roads, bridges, and other transportation systems to keep them in good condition and ensure they can handle challenges like natural disasters.”

1. **Preservation and Infrastructure Condition** – Maintain and improve the infrastructure to ensure long-term usability.
2. **Resiliency and Reliability** – Make the system resilient to natural disasters and ensure reliable travel times.

- Accessibility, Mobility, and Livability

“Make transportation easy to use for everyone, including people who walk, cycle, or use public transit, and ensure that all parts of the system connect smoothly to create better communities.”

1. **Accessibility and Mobility** – Improve equitable access to transportation, including walking, cycling, and public transit.
2. **Integration and Connectivity** – Enhance the integration of various transportation modes for a seamless user experience.
3. **Travel and Tourism** – Promote regional benefits through well-connected transportation options, fostering tourism and cross-jurisdiction cooperation.

- Economic Vitality and Efficiency

“Help the economy grow by making it easier to move goods and people efficiently, reducing congestion, and improving productivity.”

1. **Economic Vitality** – Support freight movement and economic growth by creating an efficient and robust transportation network.
  2. **Efficient System Management and Operations** – Maximize system efficiency to enhance productivity and reduce congestion.
- Sustainability and Environmental Stewardship
- “Protect the environment by conserving energy, reducing pollution, and planning transportation systems that are sustainable for future generations.”
1. **Stewardship and Sustainability** – Focus on energy conservation, environmental protection, and improving the quality of life.
  2. **Sustainability** – Ensure that transportation planning considers long-term environmental impacts and resource conservation.
